

# Personal Expense Tracker Application

Tracking the expense is one of the most important issues in daily life. The challenging task is to remember each and every transaction and make analysis for future expenses. Personal finance applications will ask users to add their expenses and based on their expenses wallet balance will be updated which will be visible to the user. They have an option to set a limit for the amount to be used for that particular month if the limit is exceeded the user will be notified with an email alert.
